	Traffic Calming in Ness	T6/51	

Proposed Traffic calming measures in Ness

Cheshire West & Chester Council is proposing to introduce traffic calming measures in Ness following concerns from residents about speeding through the village. NTC is asked to consider some financial support for this initiative by using a proportion of the CIL budget.

Background: Ness is a small village with little private parking so cars are left outside the houses along the Burton Road. Mill Lane, close to the bend by the Wheatsheaf public house, is also used as an alternative route to Lees Lane to reach the A540.

This, combined with several through cars exceeding the speed limit, leads to potentially dangerous situations for both motorists and pedestrians.

Cllr Pat Kynaston

NOTE: Any expenditure from the CIL (Community Infrastructure Levy) budget is a matter for Council. The Transport Sub-committee may make a recommendation for consideration at a future Council meeting. Criteria for use of CIL will need to be confirmed.
