		Council Climate Emergency Workshop	ES1/9

During July Cllr Samuel attended a climate emergency workshop designed for local councils and Cllr Samuel will feed back on this training at the meeting. Background information about the purpose of the workshop is copied below.

COUNCIL CLIMATE EMERGENCY WORKSHOP

Save Our Shropshire CIO has developed an online workshop for Parish or Town Councillors and Clerks who want practical understanding of what they need to do to tackle the Climate Emergency within their community. [SOS CIO](#) believe that Parish and Town Councils are a vital focus point, who can engage householders in making a difference to the way we can all live well for the planet. This workshop has been developed based on a toolkit from the Carbon Literacy Project and you will get a certificate that you are “Carbon Literate”, if you successfully complete their assessment.

Delivered over 3 x evening or 2 x daytime sessions - via Zoom - the course covers: -

- A description of why the Climate emergency is a disaster
- We will show how you can calculate your footprint using standard tools
- We will then describe what action the world, UK and local areas are taking to tackle the threat of the climate emergency.
