

	Meeting (No)	<b>Market &amp; Town Hall Committee (3)</b>
	Date	<b>27 September 2022</b>
	Document	Ref No
	<b>Use of Town Hall for Defibrillator Training</b>	<b>MTH3/37d</b>

The Community & Environment Committee is currently reviewing how it increases access to defibrillators across the area and promotes confidence in the use of the equipment. At its next meeting C&E will be considering options to achieve these aims, one of which will be the feasibility of facilitating a programme of community training in the use of defibrillators.

C&E has requested that M&TH Committee considers whether it would be possible to offer the Town Hall without charge for community training sessions in the use of defibrillators.

Should the M&TH Committee agree to this request, the Committee may wish to do so on the following conditions:

- the sessions must be open to all Neston residents and free of charge for participants;
- the sessions must be facilitated by a suitably trained instructor from a recognised organisation such as British Heart Foundation;
- the Town Council will provide the hall on a hire-only basis, the training provider must hold appropriate insurance to cover the event and the Town Council will not assume any liability for the training sessions;
- the Town Hall will be made available without hire charge for a maximum of [insert number] sessions per year and the timing of these sessions must not inconvenience fee-paying hirers.

***Please note that this request is not linked to agenda item 37c and the two should be considered as separate requests.***
